SUMMARY

I love building visually appealing and fluid front-end interfaces, being obsessive over craft. I have an inquisitive mind and appreciate a holistic way of solving design problems. I seek to learn what works and do more of it. Learn what doesn't and change it. As a designer and developer, I seek to design in a digital environment intended to unite and communicate people.

EXPERIENCE

After School Program Instructor
Generation Code
11/2017 - 04/2018
- Taught students the foundations of computational thinking and block-based coding, as well as best design practices
- Focused on usability, utility, and engagement, students were able to think like web developers by teaching them how to format code using HTML, CSS, and JavaScript

Web Development Immersive
General Assembly
06/2017 - 09/2017
- Attended a 12-week Web Development course on a full scholarship provided by Per Scholas Inc
- Engaged in peer programming and worked with a team using test-driven development and collaboration practices in Git to develop and maintain a web application

Web/Graphic Designer
FunWall Gaming
02/2016 - 03/2017
- Executed all digital assets from concept to final hand-off
- Created designs for event collateral, business cards, brochures, banners
- Created a variety of digital contents for website and advertisement
- Conceptualized and designed website from wireframes and UI design

Visual Designer Intern
EMM KUO
03/2015 - 07/2015
- Designed, conceptualized, and executed social media campaigns
- Executed and produced design assets for diverse media (print, web, packaging)
